

### Speedheat® Patented Heating Element Wire

Double-insulated, multi-stranded, self-regulating, ultra-thin (*less than 1/16"*) with full-ground surround.

(for durability, flexibility, safety, ease-of-installation, corrosion resistance, and energy efficiency)

### ProtectaMesh™

Self-adhesive mesh for added element protection during installation.

(sometimes used in lieu of **SecuraMat™** protective decoupling membrane)

### Speedheat® Adhesive Tape

Tape on either side of Speedheat® flexible strip heaters with peel off wax backing (factory-installed)

### Tear'n'Turn™ Strips

The Speedheat® Tear'n'Turn™ Strips allow for easy installation in hard to size areas.

(no cold spots – just Tear'n'Turn for perfect heating in even the smallest, most intricate areas with ease.)
