

**Hard Surfaces
White Side Up**

**Carpeting
Dark Side Up**

About KlimaGrip™

- Has enough body and density to resist the horizontal movement that creates the buckling effect of the pad under a rug.
- The light cushioning effect allows the pad, the RugBuddy and the rug to breathe together with no risk of oxidation or discoloration of any flooring surface.
- Will not bond permanently to the floor. It is a moveable underlayment; harmless to carpeting, hard floors, and rugs.
- 100% textile with no rubber, vinyl, or foam and is odorless.
- **Easy to install** in combination with a RugBuddy™.

KlimaGrip™ is Made of

is made of two non-woven polyester fabrics that are permanently needle-punched together and coated, on both sides, with a specially formulated water-based pressure sensitive dry adhesive.

KlimaGrip™ Also

- Prevents wrinkling, buckling, crawling or moving of an area rug and RugBuddy™ on **any** type of flooring: Tile and Stone, Hardwood, and Wall-to-wall Carpeting!
- Provides thermal insulation between a hard floor and the heating panel, improving the performance and efficiency of the RugBuddy™ portable under rug floor heater!

Installation Instructions

On Hard Surfaces

1. Remove plastic protective cover.
2. Place the dark side of the pad down on the floor.

On Carpet

1. Remove plastic protective cover.
2. Place the white side down on the carpet.
